Subject: Andy Frei now of OSU-Cascades formally of WSU Pullman Housing Senior Staff and cousin or son of the Moscow , Idaho Police chief and I had one friendly possible date on campus before his promotion made it unprofessional to date. He set room assignments. He had a boyfriend live with him before so it is not outing and he kept mentioning boys showers during training. He could have accessed the apartment to frame Brian Christopher Kohberger

Residence life has significantly expanded their staff and they face all being fired and replace my students and the resident assistants and other students staff should be returning to campus today or tomorrow to begin services and training. If Griffin Hogan and Jack Van Damme have guns and are concerned they might choose this moment to act. That is my guess. I worked with them 5 months. Sexually harassed and assaulted by senior staff and Hogan stole my Facebook stories smart glasses and my demands to return them on our work social got me banned and threatened. Ask FBI or State about me. For now protect WSU. No Uvalde if you don't act please. At least use drones.

Washington State University housing and residence life had access to Brian Christopher Kohberger's apartment on campus and could have taken with gloves that they stock his personal knife which they are allow to have; and left it underneath the woman who died - Goncalves - in Idaho without him ever walking in the room and there are people who are his size and build working now for housing who wearing a mask would have appeared to look like him and I accused of having a gun. Why? because he is a criminologist and was close to solving a case on campus per se. This information will raise reasonable doubt and should be offered to the Moscow Idaho Police Department so that it can get to the attorneys responsible and as I have open litigation as a Native American directly with these individuals not through your courts which I can't trust at the moment because I am also working against State Bars of Attorneys to clear up their legal status as legal or profiteering. And so I am working directly on my case because I'm trained to do so. It's possible that they took and placed his knife which is why his DNA is on it.
